

Erdan Kudaibergen

Boston, MA, USA | 617-999-4743 | erdankud@bu.edu | www.linkedin.com/in/erdan-kudaibergen

EDUCATION

MBA and MS Digital Technology (two degrees)

Expected May 2027

Boston University, Questrom School of Business; Boston, MA

- Relevant Coursework: Digital Product Build, Systems Architecture, Gen AI in Business, Python, SQL, Machine Learning, Deep Learning, and others

BA Economics

May 2021

Bard College; Annandale-On-Hudson, NY

WORK EXPERIENCE

Rae Health; Bristol, ME

June 2026 to September 2026

Product Manager Intern

- Defined the company's first North Star metric and supporting metric tree (Reach → Activation → Retention → Clinical Engagement) for a live clinical wearable platform.
- Analyzed an event level data (85 patients, ~91,000 detection events, 6 months) to compute the product's first measured baseline: active patients, activation rate, qualified monitoring density, response rate.
- Stress-tested the ROI model behind the company's growth strategy: traced each figure to source, formula, or "unverifiable", and recomputed break-even and reframed the claim before it reached prospects.
- Ran 6 customer interviews alongside with usability studies to validate hypotheses before committing engineering capacity. Identified a gap in the acquisition funnel and translated it into a scoped, prioritized backlog item.

Questrom Consulting Lab; Boston, MA

June 2026 to Present

Project Manager

- Mapped 150+ back office systems across 9 departments via 8 stakeholder interviews; built a systems-relationship tool surfacing \$700K in projected annual savings from redundant tooling.
- Led the development of an enterprise AI knowledge assistant and RAG solution while coordinating project execution, technical workstreams, deliverables, and stakeholder alignment.

Attract Group; Las Vegas, NV

June 2021 to March 2025

Senior IT Project Manager

- Owned discovery to launch for 10+ client products across fintech, marketplace, and healthtech; ran requirements, functional decomposition, and MVP scoping on engagements up to \$400K.
- Owned product and project backlog, including requirements gathering, project planning, feature prioritization, functional decomposition, and tasks estimation - leading to on-time delivery of 90% of projects.
- Controlled project delivery timelines, roadmaps, and resource allocation to ensure 0% of budget loss.
- Led multiple large, cross-functional teams of up to 15 developers and specialists, including Back End, Front End, Mobile, QA, DevOps, Designers, and Business Analysts.
- Utilized Agile Scrum methodology in 3 large teams to maintain development efficiency.
- Defined technical specs; align architecture with business goal.
- Served as a mentor for junior managers, providing guidance and support.

PRODUCT PROJECTS

Product Management Thinking Coach App — Founder & Product Lead

June 2026 to Present

- Took a learning app from problem statement to a working end to end build: a PM skill tree of structured learning blocks and interactive decision scenarios to learn and evaluate your seniority level, on a SwiftUI client with a FastAPI + Postgres backend.
- Designed scoring to reward reasoning over answer-picking: rationale and communication carry 60 of 100 points against 25 for the decision itself, enforced by a content validator that rejects any scenario where a defensible alternative scores too low.
- Covered 7 competency tracks across three proficiency levels: product sense, analytics, user research, prioritization, execution, communication, and system design track (data storage, component interaction, scale, performance and cost, AI systems, and security).
- Total of 159 lessons, 36 simulation scenarios, and a 515-term glossary
- Implemented an audio overview feature that narrates lessons and coaching feedback for hands-free review.
- Defined the beta success metrics: activation, time to first value, D7 repeat practice, and feedback usefulness.

SKILLS

Product: Discovery & customer interviews, PRDs, roadmapping, RICE prioritization, A/B testing & experiment design, competitive analysis, leading cross-functional teams.

Data & AI: SQL, Python (pandas), Tableau, Excel, Amplitude; RAG architecture, LLM evaluation & prompt design, Claude Code, model tradeoffs (latency/cost/quality).

Tools & Certifications: Jira, Confluence, Figma, Linear; Professional Scrum Master I (PSM I)

Languages: English (Fluent), Russian (Native)
